1	5. (Original) The system of claim 1 wherein the consumable
2	order assistance computer program is further configured to request at least one
3	level of authorization from a user before sending an order via the communication
4	link to a reseller of the consumable.
1	6. (Original) The system of claim 1 wherein the consumable
2	order assistance computer program is further configured to request at least one
3	level of authorization from a user before sending an order via the communication
4	link to a reseller of the consumable.
7	mix to a resolution the consumable.
1	7. (Original) The system of claim 1 wherein the consumable
2	order assistance computer program is further configured to prompt a customer
3	user for authorization information.
1	8. (Original) The system of claim 1 wherein the
2	communication link comprises an electronic communication link that enables the
3	consumable order assistance computer program to submit an e-mail order.
1	(Original) The system of claim 1 wherein the
2	communication link comprises an electronic communication link that enables the
3	consumable order assistance computer program to submit a facsimile order.
1	10. (Previously amended) A computer-implemented system
	10. (Floridadly difference) / Compater implemented dystem

10. (Previously amended) A computer-implemented system which implements a program in which consumable components of computer peripheral devices are replenished, the system comprising:

a notification system that alerts a user of a personal computer that they need to order a consumable for a computer peripheral device associated with the personal computer;

a facilitation system that provides a communication link with a reseller of the consumable; and

at least one from a list of a consolidation system for consolidating a plurality of orders, an authorization system for confirming that a user is

1 authorized to place an order for the consumable, and an order assistance system

- 2 that places an order for the consumable.
- 1 11. (Original) The system of claim 10 wherein the notification
- 2 system identifies for the user a part number for a consumable that needs to be
- 3 ordered for the computer peripheral device.
- 1 12. (Original) The system of claim 10 wherein the notification
- 2 system comprises a messaging system within an embedded web server of a
- 3 computer peripheral device and a messaging system within a personal computer.
- 1 13. (Original) The system of claim 12 wherein the personal
- 2 computer further comprises a browser, and the messaging system comprises an
- 3 e-mail application, wherein the computer peripheral device sends an e-mail
- 4 notification to the personal computer to alert a user to a need to order a
- 5 consumable.
- 1 14. (Original) The system of claim 13 wherein the e-mail
- 2 notification identifies the consumable by a part number.
- 1 15. (Original) The system of claim 10 wherein the system
- 2 comprises the consolidation system configured to aggregate a plurality of
- 3 notifications for one or more computer peripheral devices.
- 1 16. (Original) The system of claim 10 wherein the system
- 2 comprises the authorization system configured to request authorization from a
- 3 user prior to automatically submitting an order for the consumable to a reseller
- 4 of the consumable.
- 1 17. (Original) The system of claim 10 wherein the system
- 2 comprises the order assistance system configured to automatically submit an
- 3 order for the consumable in response to receiving a notification that a
- 4 consumable needs to be ordered.
